

Manyu Simha Ravi

msr74007@gmail.com | +91-8296479899 | Bengaluru, India

Education

Bachelor of Engineering in Computer Science and Cyber Security

Expected May 2027

Dayananda Sagar College of Engineering

Technical Skills

Security & Fundamentals

OWASP Top 10 (SQLi, XSS, CSRF, IDOR, Broken Auth), Penetration Testing, Vulnerability Assessment, Network Security, OSINT

Tools

Burp Suite, Nmap, Metasploit, Wireshark, sqlmap, Hydra, Dirb, tcpdump, Splunk

Platforms & Labs

Kali Linux, HackTheBox (10+ boxes), TryHackMe, PortSwigger Academy (30+ labs), DVWA

Programming & Scripting

Python (automation), Bash, JavaScript, Node.js

OS & Networking

Linux (CLI, file permissions, priv-esc), Windows; TCP/IP, DNS, HTTP/HTTPS, ARP, packet analysis

Recon & Enumeration

Shodan, theHarvester, Google Dorking, subdomain enumeration, passive/active recon

Projects

Vulnerable Web Application Security Assessment

Jan 2025

Node.js, PostgreSQL, Burp Suite

- Built a full-stack CRUD web application with intentional vulnerabilities (SQL Injection, XSS, Broken Authentication, IDOR) for hands-on penetration testing practice.
- Performed a security assessment using Burp Suite and documented 8+ OWASP Top 10 vulnerabilities with proof-of-concept exploits.
- Implemented input validation, parameterized queries, JWT authentication, and output encoding to reduce the attack surface.
- Prepared a penetration testing report with CVSS scores, exploitation steps, and remediation recommendations.

OSINT Reconnaissance Framework

Feb 2025

Python, Shodan API, theHarvester

- Developed an automated reconnaissance tool integrating Shodan API, WHOIS, DNS enumeration, and subdomain discovery to gather infrastructure data.
- Added multithreading to speed up scans, reducing manual reconnaissance time by approximately 60%.
- Generated HTML reports categorizing findings by risk level and highlighting exposed services and potential attack vectors.

HackTheBox & TryHackMe CTF Challenges

Ongoing

Kali Linux, Metasploit, Privilege Escalation

- Solved 10+ HackTheBox machines and 15+ TryHackMe rooms focused on web exploitation and Linux privilege escalation.
- Documented write-ups covering reconnaissance (Nmap), exploitation (manual SQLi, Metasploit), and post-exploitation.
- Practiced privilege escalation techniques including SUID binaries, sudo misconfigurations, and kernel-level exploits.

Certifications & Training

- **PortSwigger Web Security Academy** — Completed 30+ hands-on labs (SQLi, XSS, CSRF, Auth, SSRF).
- **TryHackMe** — Offensive Pentesting Path (In progress): Web Fundamentals, OWASP Top 10, Linux PrivEsc.
- **HackTheBox** — Active learner; 10+ easy boxes solved.
- **OverTheWire: Bandit** — Completed all 34 levels focusing on Linux command-line fundamentals.

Relevant Coursework

Computer Networks | Operating Systems | Database Management Systems | Web Technologies | Computer Security | Data Structures & Algorithms

Achievements

- Participated in 3 Capture the Flag (CTF) competitions focused on offensive security tasks.
- Attended multiple hackathons emphasizing cybersecurity and web development.
- Built and deployed a vulnerable web application used for penetration testing practice and learning remediation strategies.

Available for cybersecurity internship opportunities. Can provide detailed write-ups and code for projects on request.
